

Gestational trophoblastic diseases 2nd EOTTD Belgrade seminar

FINAL PROGRAMME

15.
SEPT
2023.

Belgrade

On behalf of the Association of the Gynecologists and Obstetricians of Serbia, Montenegro and the Republic of Srpska, I would like to cordially invite you to the Second Course on Gestational Trophoblastic disease. The meeting will be held in Belgrade, Serbia, on the 15th of September 2023, under the auspices of the European Organization for Treatment of Trophoblastic Diseases (EOTTD).

Gestational trophoblastic diseases (GTD) represent a small subgroup of rare gynecologic diseases. Accordingly, centralization of care, formation of national referral centers and close collaboration and exchange of knowledge among clinicians and researchers are of paramount importance.

The Course is intended to gather gynecologists managing gestational trophoblastic disease, with the aim to educate, share experiences, promote collaboration between regional centers, further contributing to the establishment of European network of the GTD centers.

This will be an interactive meeting, including the state of the art lectures on Gestational Trophoblastic Disease, as well as case presentations and live discussion on management in different situations and difficult cases. We hope that this meeting will be an opportunity not only to gain knowledge, but also to make contacts for cooperation and friendship in the future.
