PROGRAMME

18th INTERNATIONAL CONGRESS

ASSOCIATION OF GYNECOLOGISTS AND OBSTETRICIANS
OF SERBIA, MONTENEGRO AND REPUBLIC OF SRPSKA

HOTEL CROWNE PLAZA, BELGRADE
19–21 OCTOBER 2023

Dear colleagues,

It is with exquisite pleasure to welcome you to 18th International Congress of the Association of Gynecologists and Obstetricians of Serbia, Montenegro and Republic of Srpska (UGOSCGRS) which will be held on October 19-21st, 2023, in Belgrade (Serbia). In addition to the great importance for keeping and improving connections between colleagues from our region, this year's annual meeting of UGOSCGRS is truly special because it is dedicated to the celebration of the 100th anniversary of the foundation of Clinic for Gynecology and Obstetrics, University Clinical Center of Serbia. Being alma mater for the generations of Ob&Gyn specialists who founded majority of relevant gynecological institutions in Serbia and in the region, the Clinic for Gynecology and Obstetrics (University Clinical Center of Serbia) has been essential for the development of our profession in this part of Europe. Being a place of Ob&Gyn specialization since its foundation in 1923, the Clinic for Gynecology and Obstetrics (University Clinical Center of Serbia) has been pivotal for women health care on all levels of health system. We hope that we will celebrate this important anniversary properly.

As every year so far, participation in the congress will be taken by some of the most important experts from the world and the region, as well as representatives of relevant international associations. The congress program will cover interesting topics in gynecology, gynecological oncology, obstetrics, perinatology, minimally invasive surgery, assisted reproductive technologies and reproductive endocrinology.

Appreciating the importance of fertility preservation, both at the individual and the level of society, in partnership with the Serbian Society for Fertility Preservation and Oncofertility, within the congress, we will host the 2nd International Symposium of the Serbian Society for Fertility Preservation and Oncofertility, where leading experts will share with us novelties from this particular field of reproductive medicine.

We hope that this year's congress will meet the expectations of all participants and that we will celebrate the centenary of the Clinic for Gynecology and Obstetrics (University Clinical Center of Serbia).

With best wishes,

President of Association of Gynecologists and Obstetricians
of Serbia, Montenegro and Republic of Srpska
